## CREATIVE ART FOR ALL AGES

Established in 1996 the school has grown into a well known and recognized learning institution preparing students for further tertiary studies and a vocation in art, bridging the gap between recreational and vocational learning.

## VISION

We strive to maintain a personal touch, every student's creative path is considered important to us. In art education we celebrate differences of interpretation and new discoveries. The sharing of creative ideas and problem solving is what makes art exciting. Teaching staff & students form a close bond throughout the courses and many friendships develop.

*Develop your creative talent*
